OVERVIEW PARAGRAPH ■

Get that world-renowned JBL Professional sound, anytime, anywhere with the new JBL EON ONE PRO—the first, portable, battery-powered, linear-array PA system in its class. With a lighter, more compact design and up to six hours of play time provided by a rechargeable lithium-ion battery, you can now take your performances to places you've only dreamed of. Bring the band along and get pristine audio quality through its seven-channel analog mixer with integrated effects. And keep the crowd engaged between sets by streaming Bluetooth® audio from your mobile device.

Carry your PA with just one hand. Set up and get that legendary JBL sound in seconds. Cut the cord and give your fans powerful, unique experiences—pop-up performances, remote weddings, subway stops, beach bonfires, rooftops, street corners, and more—the only limitation is your imagination. PLAY ANYWHERE with the new JBL EON ONE PRO.

EON ONE PRO

All-in-One Rechargeable PA Solution

KEY MESSAGES ■

PLAY ANYWHERE - TAKE YOUR PERFORMANCE TO NEW PLACES

The EON ONE PRO empowers you to give your fans incredible live experiences, wherever your inspiration takes you—on a mountain or the beach, subway or streetside—even when you can't plug in. Music transcends boundaries, why shouldn't your PA? That's why we created the first-in-class battery-powered linear-array PA system, so you get amazing sound everywhere you go. The rechargeable lithium-ion battery provides up to six hours of play time, so you can give back-to-back performances without an outlet. Leave the generator at home.

SOUND AND COVERAGE ACROSS ALL ANGLES

Leveraging JBL's patented, pioneering research and development around linear array design, the EON ONE PRO optimizes sound dispersion so your audience can hear your performance from all angles—even from behind. Similar to the technology used in large venue speaker arrays, the JBL EON ONE PRO optimizes the spacing of each driver to ensure amazing sound quality and consistent directionality, allowing your crowd to hear every note, from every angle, just as you intended it. EON ONE PRO houses an incredible 8" subwoofer with bass-flex technology providing well-defined low frequency response that you would only expect from larger PA solutions.

COMPACT AND EASY-TO-CARRY DESIGN

With EON ONE PRO's easy-to-carry, lightweight and versatile design, you only need one hand—and one trip from the car. The linear-array speaker system fully collapses into the base, no shoulder bags or multiple trips required. An ergonomic handle design and light weight of just 37.5 pounds (17 kg) means EON ONE PRO rests perfectly parallel to your body during transport—making it easy to take it with you to even the most remote locations.

THE CONNECTIONS YOU NEED

EON ONE PRO's streamlined 7-channel mixer has the inputs, effects, and features you need for the perfect mix. Get optimal sound from electric guitars and other instruments by plugging into its two Hi-Z inputs, and take advantage of the warmth of professional condenser microphones with +48v phantom power. With four combo 1/4" / XLR inputs, a 3.5mm jack, and a stereo RCA input, you can connect virtually anything you desire. Bass, treble and reverb controls allow you to fine tune your tone. And for an even bigger sound, connect a second EON ONE PRO to the pass-thru input.

STREAM BLUETOOTH AUDIO WHENEVER YOU NEED IT

No wires, no problems. With EON ONE PRO, keeping your crowd engaged when the bands on break is easier than ever. Stream music from any Bluetooth-enabled device to keep the party going, or even use this for backing tracks. And, with a built-in USB port, you won't need to worry about keeping your device charged—just plug it in. There's even a built-in tablet stand so your device is always in reach.

CAPTURE YOUR PERFORMANCE OR SET THE VIBE

You spend so much time working to get that perfect sound and performance, it deserves to be captured. The EON ONE PRO features an accessory mount located at the top of the line-array speakers—simply attach a GoPro® camera and you're ready to record. You can also add a lighting element to set the perfect vibe.
